CORROSION INHIBITOR, LUBRICANT AND MULTI-PURPOSE PROTECTIVE SPRAY

REPELS HUMIDITY AND PREVENTS ELECTRICAL CONTACT

It forms a protective layer between the application surface and moisture. It immediately eliminates short circuits caused by moisture. In cases where electrical contact is involved It is an ideal choice for use.

CLEANS DIRT AND OIL

It completely cleans the thick layer of grease, dirt, label and adhesive residues from the surface without containing any abrasive substances. It protects against decay and rust with the film layer it creates.

OPENS STUCK ITEMS

It penetrates into parts stuck due to rust. It dissolves the structure of rust and provides easy removal of stuck parts.

SILENCES UNWANTED SQUEAKS

It ensures that the lubricants it contains spread over the entire surface and adhere perfectly to moving parts. Door, glass etc. It silences the squeaks occurring in the fasteners.

SILICONE-FREE AND DIRT-PROOF
It does not contain silicone. Since it does not contain any additives that collect dust and dirt, it does not create a dirt layer on the surface.

Akfix

A4U Magic Easy Application Adapter is now two in one!

1 Straw Application

By using the pipette on the easy-to-use adapter, you can make precise applications even in the narrowest areas.

2 Spray Application

You can apply to large surfaces with the spray part without the need for a pipette.
